ECONOMIC SNAPSHOT: MINNESOTA

Includes Bureau of Labor Statistics jobs and unemployment data through January 2014

JOBS

- In January, private-sector employment in Minnesota grew by 900 jobs. Over the past year, the Minnesota private sector has added 50,200 jobs. This compares with an increase of 46,900 jobs over the 12 months ending in January 2013.
- Minnesota private-sector employers have added 187,400 jobs (an increase of 8.5 percent) since February 2010, the national low point for private-sector employment.
- In Minnesota, the following sectors have posted the largest job gains since February 2010: education and health services (43,600 jobs), professional and business services (38,200 jobs) and trade, transportation and utilities (27,300 jobs).
- The Minnesota sectors with the greatest job gains in percentage terms since February 2010 are: mining and logging (25.0 percent), construction (20.8 percent) and professional and business services (12.3 percent).

UNEMPLOYMENT

- The unemployment rate in Minnesota was 4.7 percent in January 2014, holding constant from December. The rate is down 0.6 percentage point from one year earlier and is below its recent peak of 8.3 percent in June 2009.
- 141,500 Minnesota residents were unemployed during January 2014, down from a recent high of 246,800 in May 2009. There are still 2,400 more people unemployed in Minnesota than when the recession begain.
- In Minnesota, initial claims for unemployment insurance benefits totaled 21,246 during January, down 12.3 percent from the previous month. Total initial claims over the past 12 months are down 7.0 percent from their level over the 12 months before that.

EXPORTS

- In Minnesota, exports totaled \$1.6 billion in January and \$20.7 billion over the past year, up 1.4 percent from the 12 months ending in January 2013 (inflation-adjusted dollars).
- Minnesota exports over the past 12 months are up 17.5 percent from their level in the same 12-month period four years earlier (inflation-adjusted dollars).

Housing

- Home prices in Minnesota increased by 5.3 percent from the fourth quarter of 2012 to the fourth quarter of 2013 (the most recent quarter for which data are available). They are up 8.1 percent since their recent low in the second quarter of 2012 but remain 14.8 percent below their pre-housing-crash peak.
- Housing starts in Minnesota totaled 4,420 units (seasonally adjusted annual rate) in January 2014, a decrease of 79.6 percent from December.
- Within the Midwest census region, which includes Minnesota, sales of new single-family homes totaled 48,000 units in January 2014, a decrease of 17.2 percent from December 2013. Sales of existing single-family homes decreased by 6.7 percent to 970,000 units (at seasonally adjusted annual rates) from December 2013 to January 2014.

How Does Minnesota Compare to Other States?

Workers across the country were hit hard during the recent recession. Since then, employment in some states has returned to pre-recession levels, while employment in other states remains below pre-recession levels. The chart below allows for a comparison of Minnesota to other states using two metrics.

The unemployment rate (measured along the horizontal axis) serves as a gauge of current labor-market conditions in Minnesota, while net job gains since the recession began (current nonfarm jobs as a share of jobs prior to the recession) measures progress toward labor-market recovery (vertical axis).

States falling in the upper left quadrant have net job gains since the start of the recession and unemployment rates lower than the national unemployment rate. States falling in the lower right quadrant have higher unemployment rates than the United States overall and are still experiencing net job losses relative to pre-recession levels.

Note: The figure above excludes North Dakota, which has a current unemployment rate of 2.6% and net job gains totaling 24.7% since the start of the recession.
